

PATENT  
Serial No.: 09/690,367  
Docket No. 28150.9  
Customer No. 000027683

**Listing of Claims**

The following listing of claims will replace all prior versions, and listings, of claims in the application.

8. (Previously presented) The method of Claim 11 wherein the forming comprises:

forming the link within the second version, wherein the reference specifies a different location within the paper, wherein the second location is the different location, and wherein the operation includes displaying the different location on the display device as part of the likeness in response to a selection of the first location.

9. (Currently amended) The method of Claim 11 wherein the forming comprises:  
forming the link within the second version, wherein the reference specifies an identity of a script, wherein the second location is a location of the script, and wherein the operation includes executing the script in response to a selection of the first location.

10. (Previously presented) The method of Claim 11 wherein the translating comprises:

forming the link within the second version, wherein the reference specifies an address of a website external to the paper, wherein the second location is the website, and wherein the operation includes displaying the website on the display device in response to a selection of the first location.

PATENT  
Serial No.: 09/690,367  
Docket No. 28150.9  
Customer No. 000027683

11. (Currently amended) A method performed by a computer system, comprising:  
storing a first version of a ~~mass-produced printed paper~~;  
translating the first version into a second version of the paper, the second version  
being displayable on a display device as a likeness of the paper;  
in response to content within the first version, detecting a reference by the content at a  
first location within the paper, the detected reference being associated with a second location;  
and  
in response to the detected reference, forming a link within the second version  
between the first location and the second location, and the first location being displayable on  
the display device as part of the likeness and selectable to cause an operation associated with  
the second location.
12. (Previously presented) The method of Claim 11 wherein the translating  
comprises:  
forming a link table in the second version; and  
including information associated with the link in the link table.
20. (Previously presented) The system of Claim 23 wherein the reference  
specifies a different location within the paper, wherein the second location is the different  
location, and wherein the operation includes displaying the different location on the display  
device as part of the likeness in response to a selection of the first location.
21. (Currently amended) The system of Claim 23 wherein the reference specifies  
an identity of a script, wherein the second location is a location of the script, and wherein the  
operation includes executing the script in response to a selection of the first location.
22. (Previously presented) The system of Claim 23 wherein the reference  
specifies an address of a website external to the paper, wherein the second location is the  
website, and wherein the operation includes displaying the website on the display device in  
response to a selection of the first location.

PATENT  
Serial No.: 09/690,367  
Docket No. 28150.9  
Customer No. 000027683

23. (Currently amended) A system, comprising:  
a computing device for:  
storing a first version of a ~~mass-produced printed~~ paper;  
translating the first version into a second version of the paper, the second  
version being displayable on a display device as a likeness of the  
paper;  
in response to content within the first version, detecting a reference by the  
content at a first location within the paper, the detected reference being  
associated with a second location; and  
in response to the detected reference, forming a link within the second version  
between the first location and the second location, and the first  
location being displayable on the display device as part of the likeness  
and selectable to cause an operation associated with the second  
location.

24. (Previously presented) The system of Claim 23 wherein the computing device  
is for translating the first version into the second version, wherein the translating comprises:  
forming a link table in the second version; and  
including information associated with the link in the link table.

32. (Previously presented) The computer program product of Claim 35 wherein  
the reference specifies a different location within the paper, wherein the second location is  
the different location, and wherein the operation includes displaying the different location on  
the display device as part of the likeness in response to a selection of the first location.

33. (Currently amended) The computer program product of Claim 35 wherein the  
reference specifies an identity of a script, wherein the second location is a location of the  
script, and wherein the operation includes executing the script in response to a selection of  
the first location.

PATENT  
Serial No.: 09/690,367  
Docket No. 28150.9  
Customer No. 000027683

34. (Previously presented) The computer program product of Claim 35 wherein the reference specifies an address of a website external to the paper, wherein the second location is the website, and wherein the operation includes displaying the website on the display device in response to a selection of the first location.

35. (Currently amended) A computer program product, comprising:  
a computer program processable by a computer system for causing the computer system to:

store a first version of a ~~mass-produced printed paper~~;  
translate the first version into a second version of the paper, the second version being displayable on a display device as a likeness of the paper;  
in response to content within the first version, detect a reference by the content at a first location within the paper, the detected reference being associated with a second location; and  
in response to the detected reference, form a link within the second version between the first location and the second location, and the first location being displayable on the display device as part of the likeness and selectable to cause an operation associated with the second location; and  
an apparatus from which the computer program is accessible by the computer system.

36. (Previously presented) The computer program product of Claim 35 wherein the computer program is processable by the computer system for causing the computer system to translate the first version into the second version, wherein the translating comprises:

creating a link table in the second version; and  
including information associated with the hyperlink in the link table.

PATENT  
Serial No.: 09/690,367  
Docket No. 28150.9  
Customer No. 000027683

37. (Currently amended) The method of Claim 11 wherein the forming comprises: forming the link within the second version, wherein the reference specifies an identity of a document external to the paper, wherein the second location is a location of the document, and wherein the operation includes displaying the document on the display device in response to a selection of the first location.

38. (Currently amended) The method of Claim 11 wherein the forming comprises: forming the link within the second version, wherein the reference specifies an identity of a file external to the paper, wherein the second location is a location of the file, wherein the file includes visual image information, and wherein the operation includes displaying a visual image on the display device in response to the visual image information and a selection of the first location.

39. (Currently amended) The method of Claim 11 wherein the forming comprises: forming the link within the second version, wherein the reference specifies an identity of a file external to the paper, wherein the second location is a location of the file, wherein the file includes audio signal information, and wherein the operation includes outputting audio signals in response to the audio signal information and a selection of the first location.

40. (Previously presented) The method of Claim 11 wherein the translating comprises:  
translating the first version into the second version, the first version having a first digital format, and the second version having a second digital format.

41. (Currently amended) The method of Claim 23 wherein the reference specifies an identity of a document external to the paper, wherein the second location is a location of the document, and wherein the operation includes displaying the document on the display device in response to a selection of the first location.

PATENT  
Serial No.: 09/690,367  
Docket No. 28150.9  
Customer No. 000027683

42. (Currently amended) The method of Claim 23 wherein the reference specifies an identity of a file external to the paper, wherein the second location is a location of the file, wherein the file includes visual image information, and wherein the operation includes displaying a visual image on the display device in response to the visual image information and a selection of the first location.

43. (Currently amended) The method of Claim 23 wherein the reference specifies an identity of a file external to the paper, wherein the second location is a location of the file, wherein the file includes audio signal information, and wherein the operation includes outputting audio signals in response to the audio signal information and a selection of the first location.

44. (Previously presented) The method of Claim 23 wherein the first version has a first digital format, and the second version has a second digital format.

45. (Currently amended) The method of Claim 35 wherein the reference specifies an identity of a document external to the paper, wherein the second location is a location of the document, and wherein the operation includes displaying the document on the display device in response to a selection of the first location.

46. (Currently amended) The method of Claim 35 wherein the reference specifies an identity of a file external to the paper, wherein the second location is a location of the file, wherein the file includes visual image information, and wherein the operation includes displaying a visual image on the display device in response to the visual image information and a selection of the first location.

PATENT  
Serial No.: 09/690,367  
Docket No. 28150.9  
Customer No. 000027683

47. (Currently amended) The method of Claim 35 wherein the reference specifies an identity of a file external to the paper, wherein the second location is a location of the file, wherein the file includes audio signal information, and wherein the operation includes outputting audio signals in response to the audio signal information and a selection of the first location.

48. (Previously presented) The method of Claim 35 wherein the first version has a first digital format, and the second version has a second digital format.
